## IMPORT

- Countless formats *PDF, EDI, X-invoices, etc...*
- Across many systems *SFTP, Email, Scanner, etc...*

## SORT AND CLASSIFY

- Supports unlimited document types: invoices, contracts, handwritten forms, and more.
- Create and train custom document types with AI.

## READ

- Automatically reads over 90% of data with no prior training, powered by swarm intelligence.
- Self-learning AI improves accuracy daily.
- OCR supports over 120 languages, including handwritten text.

The screenshot displays the DocBits dashboard. At the top, there's a 'Dashboard' header with 'All documents (224)' and a search bar. Below it is a table of documents with columns for Document Name, Pages, Imported On, and Status. A modal window is open over one document, showing an 'Invoice' with a green 'APPROVED' stamp. The invoice details include: Invoice Number: 911890158, Date: 06.10.2020, and Account: 1876442. The invoice table lists items like 'Banana set: 6 pcs. in a case' and 'Mini banana set cartable 10 piece'. A 'PAYMENT DETAILS' section shows 'Payment terms: Up to 20.10.2020 minus 2,00 %'. At the bottom, there are 'Reject', 'Safe', and 'Approve' buttons.

6.23.1

## REVIEW

- Validate master data like VAT/tax ID and address.
- PO matching at the line-item level for order reconciliation.

## WORKFLOW

- Customizable rules for workflows with notifications based on document types.
- Preview documents with key fields including an option to add stamps or annotations.
- Intelligent auto-accounting for cost invoices.

## INFOR INTEGRATION

- Archive documents in Infor IDM or other DMS with attributes and annotations.
- Create or update records in Infor or ERP systems, such as creating invoice records or updating purchase orders with order confirmations.

## SMART COMMUNICATION

- The Supplier Portal ensures effortless communication with suppliers directly within the platform.
- Onboarding of Suppliers

## Why DocBits?

- ✓ **Swarm Intelligence:** Achieve over 90% accuracy without manual training.
- ✓ **Intuitive Dashboard:** Access all your data at a glance with ease.
- ✓ **AI-Driven Classification:** Handle unlimited document types with AI precision.
- ✓ **Advanced AI Extraction:** Extract data at both the header and line level.
- ✓ **Global Reach:** Supports over 120 languages for seamless global operations.
- ✓ **Comprehensive E-Invoicing:** Includes Peppol, XRechnung, and more.
- ✓ **Precise PO Matching:** Ensure accurate order reconciliation down to the line item.
- ✓ **Automated Accounting:** Effortlessly manage Non-PO invoices with auto-accounting.
- ✓ **Task Management:** Streamline workflows and keep tasks on track.
- ✓ **Powerful Workflow Engine:** Customize and automate workflows with ease.
- ✓ **Specialized Rule Manager:** Tailor workflows to specific use cases.
- ✓ **Seamless Integration:** Connect effortlessly with Infor (CloudSuite, IDM, M3, LN, CSD & CSI).
- ✓ **Scalable Multi-Tenant Solution:** Benefit from automatic upgrades with our cloud-based platform.
- ✓ **User-Friendly Interface:** Simplified UI for ease of user adoption and improved productivity.
- ✓ **Efficient Supplier Onboarding:** Onboard suppliers quickly and easily.
- ✓ **Comprehensive Supplier Management:** Manage all supplier interactions in one place.
- ✓ **Streamlined Approval Workflows:** Automate and expedite your approval processes.
- ✓ **And Much More:** Explore even more features designed to enhance your operations with DocBits.

*"Faster approval cycles lead to punctual payments to suppliers as well as the possibility to claim cash discounts. The cash discount advantage gained from this alone covers the cost of DocBits (SaaS)."*

Dr. Elisabetta Venezia  
**Director ERP, GMM Pfalder GmbH**
