DocBits

As digital as it is delicious: JERMI automates its invoice processing

ABOUT JERMI

For more than 135 years, the family-owned company JERMI has stood for passion, quality, and innovation in all things cheese. JERMI is synonymous with premium processed cheese specialties and innovative concepts for customer-specific solutions in cheese cutting and packaging.

With a deep understanding of enjoyment and technology, JERMI combines tradition and the future – and develops products that are equally valued in retail and industry.

THE CHALLENGE
Simplify complex billing processes

Processing cost and goods invoices at JERMI used to be time-consuming and error-prone, especially for invoices without a purchase order reference. Manual entries and checks delayed processes, led to discrepancies, and impaired accounting efficiency.

The goal was clear: automate processes, improve data quality, and ensure seamless integration with existing systems such as Infor M3 and IDM. JERMI was looking for a solution that would reliably process invoices, accurately validate data, and give employees more time for value-adding tasks.

THE SOLUTION: DocBits BY FELLOWPRO

To optimize invoice processing, JERMI opted for Doc**Bits** from FELLOWPRO – the AI-supported platform for intelligent document processing. What previously required time-consuming manual work is now largely automated.

Doc**Bits** reliably recognizes invoices with and without order references, extracts all relevant data correctly, and automatically transfers it to Infor M3 and IDM. Data exchange runs smoothly, and transparency in the process has increased significantly.

> "*Doc**Bits** has enabled us to significantly speed up our work processes, reduce errors, and thus gain more time for other tasks.*"
>
> *Holger Frick, Head of Financial Accounting,*
> *JERMI Käsewerk GmbH*

The user-friendly, customizable interface makes daily use particularly pleasant. In addition, intelligent add-on modules provide additional security and control:

- The PO matching module automatically compares quantities and prices with goods receipts.
- With the auto-accounting module, invoices can be assigned to accounts with just a few clicks, reducing manual rework to a minimum.

THE ADVANTAGES AT A GLANCE

TIME SAVINGS
90% increase in document processing efficiency

COST SAVINGS
Through reduced manual effort and optimized processes

HIGHER ACCURACY
More than 90% of data is extracted automatically

DIVERSE DOCUMENT TYPES
Supports a wide range of document types

EASE OF USE
Simple handling without technical know-how

SEAMLESS INTEGRATION
Smooth integration with existing systems, including Infor Cloudsuite, M3, and IDM

SCALABILITY
A solution that can grow with your needs

AI WITH ML
Intelligent technology without complex template creation

INTERNATIONAL SUPPORT
More than 128 languages and international e-invoice

The implementation went smoothly. Thanks to the seamless interfaces, Doc**Bits**, Infor M3, and IDM communicate efficiently with each other. The FELLOWPRO team provided JERMI with competent and flexible support—from customizing individual requirements to ongoing support. The quick responses and regular newsletter with information about new features and enhancements are particularly appreciated.

Not only JERMI, but also the FELLOWPRO team emphasizes the close cooperation:

*"I thought the collaboration was wonderful. We had constant good communication, and the customer's feedback always helped us to further develop Doc**Bits** and adapt the modules to the processes."*

Daniel Lopez, Project manager DocBits, FELLOWPRO AG

Thanks to this collaborative approach, individual requirements could be implemented quickly and the solution tailored optimally to JERMI's needs.

THE RESULT: GREATER EFFICIENCY AND TRANSPARENCY

Today, JERMI processes invoices with maximum efficiency and transparency.

The combination of OCR technology, real-time synchronization, automatic data reconciliation, and DMS integration takes accounting to a whole new level.

*"If we had to describe Doc**Bits** in three words, they would be user-friendly, efficient and adaptable."*

Holger Frick, Head of Financial Accounting, JERMI Käsewerk GmbH
